**ONTARIO'S PARTY HUNTING SYSTEM - MOOSE**

1. They have the proper validation tag (bull, cow, calf) within their group.
2. They can communicate and are within the legal distance with each other at all times. This system allows for the group or any individual hunter in the group to harvest an animal, as long as their group holds the proper validation tag. Example: You hold a calf validation tag. Your partner holds a bull validation tag. You are hunting on your own within communicating and legal distance and you see and kill a bull moose. At this time your partner affixed his/her bull tag to the bull moose.

**TROPHY DRIVE-IN BEAR HUNT**
